

I am urging you all to please change the current frequency for WARR 1520 in Warrenton, NC. This station is a community treasure and is very vital to our youth. This station has an internship program with the local high schools and colleges and a lot of students are wanting to broadcast their games live on the air. The community is really big on supporting the youth, so some of the listeners may not be physically able to come out to the games, but with having the games streaming live on the air, they will be able to enjoy the games from the comfort of their own homes. The students who intern at WARR 1520 work hard and really want to keep their generation involved in the evolution of radio. They want to leave their mark and be a positive outlet for the community. Please allow the station to extend beyond the current time to at least run until 10pm. We would really appreciate the consideration and just think, this decision can and will have a huge impact on the next generation who need every bit of support and encouragement that they can get. Thank you in advance for any and all consideration.
